TECHNICAL EXPERIENCE

Bootstrap Project, Mississippi Coding Academies

August, 2020

Goal: Build an example responsive landing page for a company

- Utilized Bootstrap framework to generate mobile-first responsive landing page allowing users to view the website via phone or tablet.
- Themed Bootstrap with custom CSS to create a unique feel.

JavaScript Project, Mississippi Coding Academies

August, 2020

Goal: Create a Hacker News clone to practice HTML, CSS, and JS skills

- Worked with the Hacker News API to retrieve and display data aggregating the latest tech news and discussion for consumers.
- Worked with a routing library to display multiple pages within site to help smoothe over browser inconsistencies and respond to user navigation
- Created a simple state management file so users could favorite articles and keep track of them.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript

Frameworks: Bootstrap

Other Technologies: Git, Command Line

Operating Environments: Mac (preferred), Windows
