TECHNICAL PROJECTS

HTML/CSS Project, Mississippi Coding Academies,   August, 2020
Goal: Build an example responsive landing page for a company
- Utilized Bootstrap framework to generate mobile-first responsive landing page allowing users to view the website via phone or tablet
- Themed Bootstrap with custom CSS to create a unique feel

JavaScript Project, Mississippi Coding Academies   September, 2020
Goal: Create a Hacker News clone to practice HTML, CSS, and JS skills
- Worked with the Hacker News API to retrieve and display data aggregating the latest tech news and discussion for consumers
- Worked with a routing library to create a Single Page Web app (SPW) for quicker page routing
- Created a simple state management file so users could favorite articles and keep track of them

React Project, Mississippi Coding Academies   December, 2020
Goal: Create a clone of Netflix using React and styled components
- Replicate Netflix by using a compound components architectural pattern
- Use of the React Context API for state driven rendering of components
- Integrated React Router to create protected pages and quick SPW routing

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript
Frameworks: Bootstrap, JS-React
Other Technologies: Git, github, zsh/bash terminal
Operating Environments: Mac (preferred), Windows
Currently Learning: Node.js
